SUMMARY

Junior Data Analyst with strong foundations in data analysis, data visualization, reporting, and business intelligence. Skilled in Power BI (DAX, Power Query, Data Modelling), MySQL (SQL), and Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, Dashboards). Experienced in data cleaning, transformation, exploratory data analysis (EDA), KPI reporting, and building interactive dashboards that convert raw data into actionable insights. Hands-on experience in the FinTech domain analysing transaction data & performing root cause analysis (RCA).

SKILLS

Programming languages: Python

Database: MySQL, SQL Server, Oracle

Version Control: Github

Analysis & Visualization Tools: Advanced Excel, Power BI

Soft Skills: Time Management, Data Analysis, Business Problem Solving

Professional Experience

Trainee Implementation | Finacus Solutions Pvt Ltd | Feb 2026 – Present

- Analysed payment transaction data using SQL to investigate transaction declines, identify failure patterns, and support issue resolution.
- Performed root cause analysis (RCA) and UAT testing for payment integrations by reviewing transaction logs, system responses, and banking workflows.
- Collaborated with bank representatives and internal teams to validate transactions, prepare analysis reports, and support payment gateway implementations.

PROJECTS

Walmart Retail Sales & Profitability Analysis | MySQL

[Github](#)

- Analysed large retail sales data to generate actionable insights on revenue, profitability, and product performance.
- Performed data cleaning, EDA, and metric calculations (VAT, COGS, gross income) using SQL.
- Built optimized SQL queries (joins, aggregations, subqueries) to identify sales trends and customer behaviour for business reporting.

Sales Analytics & Business Intelligence Dashboard | Excel, Power BI

[Github](#)

- Utilized Excel and Power BI to develop interactive sales analytics dashboards, leveraging Excel for data cleaning, transformation, validation, and exploratory data analysis (EDA), and Power BI for advanced data modelling, DAX calculations, KPI tracking, and interactive reporting.
- Analysed sales trends, customer behaviour, product performance, and business KPIs using Pivot Tables, Pivot Charts, dynamic visualizations, and business intelligence techniques.
- Created data-driven dashboards and reports that transformed raw sales data into actionable insights, enabling performance monitoring and informed business decision-making.

CERTIFICATIONS, TRAINING & ACHIEVEMENTS

- Intro to SQL – Kaggle (2026)
- Microsoft Power BI – Skill Course (2026)
- Microsoft Excel (Self Learning) – Skill Course (2026)

EDUCATIONAL QUALIFICATIONS

Bachelor of Computer Applications (BCA) – Gokul Global University | 2025
CGPA: 9.3 / 10
